* and **

25X1A * Comment. Compared with the preceding month, the volume of unloading operations decreased from 340 to 148 freightcars, while the number of cars which were loaded increased from 104 to 212 cars. Generally, it can be stated that in January, Soviet supply traffic dropped below the level observed in late 1951. It is believed that the GCRG and army supply installations, depleted by the summer and fall maneuvers of the Soviet occupation forces, were replenished by the end of 1951.
